

### WALKERS AND RIDERS

Transportation will be furnished to all elementary pupils who live more than three-quarter (.75) of a mile from the school they are required to attend; for middle school pupils, the limit shall be in excess of one and one-half (1-1/2) miles; for high school pupils, the limit shall be in excess of two (2) miles. Measurements, for purposes of this policy, will be done by establishing the most direct route between student residences and schools as measured electronically by computer routing.

Transportation shall be furnished for shorter distance if, in the opinion of the Superintendent, the road is unreasonably hazardous relative to the age of the child concerned.

This policy does not apply for those students assigned transportation as part of their Individualized Education Plan (I.E.P.) or to voluntary transfer students.

Nothing in this policy is intended to limit the Board's authority in the future to eliminate furnishing transportation to students as may be permitted by law.

In the event of any dispute over the proper application of this policy, the Board's decision shall be final.
