

FINDLAY CITY SCHOOLS 2020-2021 LEARNING OPTIONS PLANNING TOOL

LEARNING OPTIONS INITIATIVE

The COVID-19 school closures have dramatically changed the landscape of public education. Families who never desired to learn in a remote or online format have been forced to do exactly that for months, while our schools were physically closed.

Some of our students and parents cannot wait to return to a traditional instructional model, others are finding success with online instruction. We have also discovered that for some families, the risk of underlying medical conditions for their children or other family members make online learning an appealing option. While there are many challenges, online instruction presents opportunities and innovations in how students learn. We are considering three learning options to help each individual student achieve success.

 Traditional Option with Technology Integration

 Online Education Option

 Hybrid Option

Help Us Plan For Success:

FCS LEARNING OPTIONS

Findlay City Schools will be implementing 1:1 technology integrations for all students K-12 at the beginning of the 2020-2021 school year. This means, regardless of the preferred option, all students will have their own device to use. It is important to note that students who receive special education services will continue to be supported by their Individualized Education Plan (IEP) team in any scenario.

Traditional Option

This option will follow a traditional model, while implementing the guidelines of the State of Ohio/Hancock County Health Department, which may include but not be limited to sanitation requirements, face masks, possible adjusted schedules, and social distancing.

Online Education Option

This option will enable students to learn online. Students will not be expected to attend school in person. All of their classes will take place remotely. Online education will not be the same as it was during the spring of 2020 school closure. We learned a lot and will continue to improve our program. We are exploring a new online education platform to help us deliver high quality online instruction.

Hybrid Option

This option will enable students to experience a combination of online learning with some level of traditional school attendance/support/interaction.
